

Heavy Maintenance Singapore Services (HMS Services), a joint venture between SIA Engineering Company (SIAEC) and Airbus, leverages on the synergy of SIAEC's extensive maintenance experience and expertise, with Airbus' depth of technical and engineering knowledge as an airframe original equipment manufacturer. Airbus will develop the joint venture as its Centre of Excellence for Airbus A380 and A350 Heavy Maintenance in Asia, which will complement SIAEC's extensive airframe service offerings in Singapore and the Philippines.

As part of our growth plan, we are constantly looking out for talented, hardworking and energetic individuals who thrive on challenges and enjoy working in a fast-paced and dynamic environment. If you are looking for an exciting and fulfilling career, we are looking for suitable individuals to join us for the position of:

TECHNICAL SERVICES & PREPARATION ENGINEER

Position 1: Structures

Position 2: Aircraft Systems/Avionics

Job Description

As part of Engineering Team, you will be responsible to analyze the customer's work package and documents necessary for the performance of the maintenance work on aircraft to support the Forward Planning department

- Analyze the customer's work package, Airworthiness Directives, Service Bulletins, repairs and work arising
- Identify duplicate inspections and specific tasks
- Identify the major tasks with potential/risk findings based on historical data and check on the spares needed to complete requested inspection
- Define tools, consumables and expendables necessary to perform the work on time
- Liaise with Procurement and Tools department to ensure timely order, availability and delivery as per planning requirements
- Support production with generation of work cards
- Provide efficient, quality and cost-effective support to the aircraft maintenance production lines for all defects reported in the respective areas for the relevant ATA chapters
- Support maintenance, repairs, conversion, inspections, modification and retrofit campaigns
- Provide engineering approvals to cover deviation to the embodiment plan by liaising with the manufacturer or supplier to provide the required technical answers
- Report all defects that are beyond defined criteria to the manufacturers/suppliers and authorities.

Requirements

- Applicants should have a good Honours Degree in Engineering with at least 5 years of relevant experience in aircraft maintenance activities, engineering, planning and airline operations
- Possess strong leadership and operational skills with an analytical and innovative mind
- Self-starter with excellent communication and interpersonal skills
