## SIA ENGINEERING COMPANY SIGNS MOU WITH GULF TECHNICS TO SET UP BASE IN THE MIDDLE EAST

**SINGAPORE**, **21 January 2010** - Mainboard-listed **SIA Engineering Company Limited** (SIAEC) today announced that its special-purpose wholly-owned subsidiary, SIAEC Global Private Limited, has signed a Memorandum of Understanding (MOU) with Gulf Technics to set up and operate a facility in Bahrain for the maintenance, repair and overhaul (MRO) of aircraft.

Gulf Technics is a wholly-owned subsidiary of Mumtalakat Holding Company, the investment arm of the Kingdom of Bahrain, and a sister company of Gulf Air.

Upon signing of the MOU, both parties will work towards a Definitive Agreement to set up an MRO maintenance facility in Bahrain.

SIAEC's Chief Executive Officer, Mr William Tan said: "The establishment of a maintenance base in Bahrain will serve the needs of airlines in the Middle East to avail of high quality engineering services. The base will also be a springboard to the MRO markets in North Africa and Europe."

"We are very pleased to take the partnership we have developed with Gulf Air in Bahrain to greater heights. It is fortuitous that we have selected the debut Bahrain International Airshow to sign the MOU. It marks the confidence and vision that we share in developing Bahrain as an aviation hub for the Middle East", Mr Tan added.

Commenting on the announcement, Talal Al-Zain, CEO of Mumtalakat, said, "We are working hard to help Bahrain become a regional centre for aviation. This new maintenance facility adds another crucial component to the services on offer and will be vital in helping to attract new airlines to use Bahrain International Airport. It also fits with the best management practices that Mumtalakat is advocating to improve on corporate performance and ultimately business profitability".

The transaction is not expected to have a material impact on SIAEC's financial performance in FY2009/2010. None of the Directors of SIAEC has any interest, direct or indirect, in the transaction.
